

Tennis Ball Machine

TS-08 Manual

TS-06

Thank you for choosing TS-08 (TS-06) Tennis ball machine.

The Quick Start Guide includes an introduction to the TS-08 (TS-06) Technology Edition. Before operating the machine, please read this manual carefully to avoid unnecessary damage to the body and damage to the machine.

CAUTION:

This machine was designed to be used on a tennis court and in no other circumstances. Only tennis balls must be used, no other balls should be ejected from the machine. Never stand in front of the machine unless you are on the other side of the net (more than 7 meters (8 yards) away). Even when the machine is paused, never stand in front of it as balls can eject at any time. Children should be supervised at all times and taught never to stand in front of the machine.

Do not use the machine in rain and avoid using wet balls. We recommend the use of pressure less balls to give your machine the best performance. Using a combination of new and old balls will give inconsistent results.

Step 1: Install the software

Download and install the mobile APP software

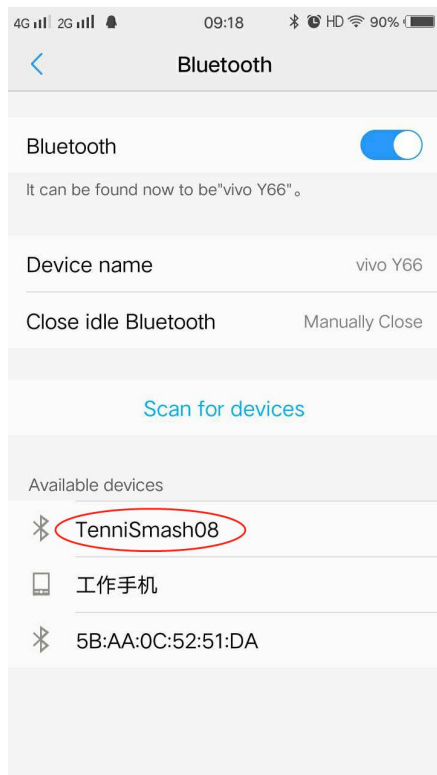

Download link:

[Http://www.tennismash.com.cn/ts0608.apk](http://www.tennismash.com.cn/ts0608.apk)

Operation panel diagram

Charging batteries:

This product is equipped with 16AH large capacity lithium battery, the battery is fully charged after the normal working time is about 6 hours. Please charge before use. While charging, the charger indicator is displayed in red, fully charged into green. When the battery is exhausted, the charging time is about 8 hours.

Use steps:

1. Place the ball machine to the right place on tennis court; fasten the ball-loading frame back on the serve machine.
2. Adjust the direction of the ball.
3. Adjust the ball speed and mode.
4. Enjoy the Tennis

Maintenance:

You can vacuum out the inside of your machine to remove ball fluff. The outside of the machine can be wiped down with a mild detergent, however, please be careful not to get water inside the machine. The throwing wheels should be wiped down after every use to prevent any buildup of residue from the balls.

Troubleshooting:

1. When the power button is pressed and the power is off, follow the steps below:

A) Check that the battery is charging.

B) Check if the fuse is blown.

2. Press the power button, the power light does not light, may be due to excessive current, battery start protection. If the battery protection lock occurs, the switch indicator light does not light. Please turn off your machine, the battery charge for 5 minutes can unlock the battery.

3. Clearing Ball Jams

If you find that a ball gets stuck behind the two throwing wheels, the machine may shut down to prevent damage to the circuit board. Please turn the machine off and clear the ball jam.

4. Other fault conditions:

If you can not personally troubleshoot, or if any of the above problems occur, please call our customer service hotline for further processing.

Product Details:
