Multi Coins Operated Timer Box

Program coins

Step 1-Set up value

Code "H": Set up "15"
 Code "P": Output signal quantity: inset a coin usually, P1=01 for Lowest value, P+number=P1 multiply value rate
 Example: 2 dollar, 4 dollar: P1=01,P2=02
 Code "F": Set up "08"
Number: indicate rank of coin type (1-6).

1. Hold on button "ADD" and "MINUS" simultaneously for seconds."A" shows up.
2. Hold on button "SET" for seconds."E" shows up.
 Use button "ADD" and "MINUS" to set up coin type between 1 and 6.
3. - Hold on button "SET" for seconds to switch to next code from H to F in cycle.
 - Please Use button "ADD" and MINUS to set up value.
 - Please hold on button "SET" for seconds to switch to next code
 - Please follow following table to set value for code.

Order: First type→Second type→Third type→Forth type→Fifth type→Six type→A→E

First type		Second type		Third type		Forth type		Fifth type		Six type	
code	value	code	value	code	value	code	value	code	value	code	value
H1	15	H2	15	H3	15	H4	15	H5	15	H6	15
P1	SET	P2	SET	P3	SET	P4	SET	P5	SET	P6	SET
F1	08	F2	08	F3	08	F4	08	F5	08	F6	08
A	A shows up after F-> Hold on button "SET" for seconds										
E	E shows up after A->Power off and on when you see "E" AGAIN after A.										

Note:

- If coin type is not up to 6, "E" shows after coin type reaches your setting.
 For example: If you set up coin type as 3, "E" shows up after F3. You can power off and on after finish "F3" and see "E"
- Hold on "SET" for seconds to switch code.

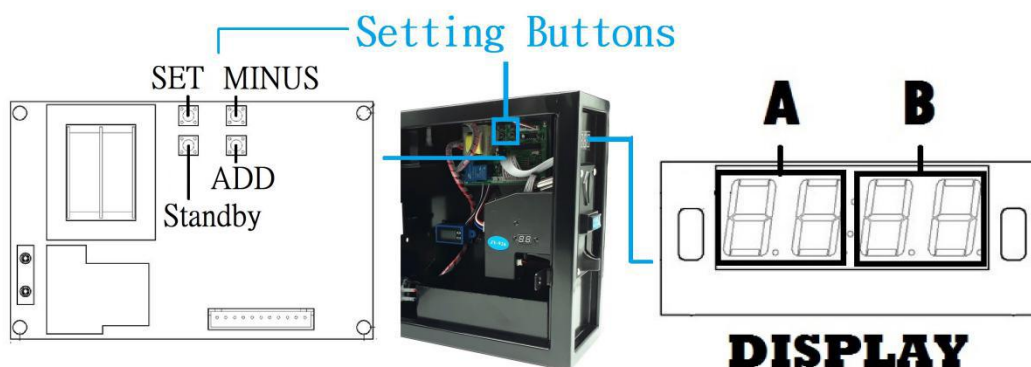

Step 2-Sample Coin

1. Hold on "SET" for seconds, and "A1" shows up from display.
2. Please insert coins of **TYPE 1** into coin entry until "A1" shows up again.
3. Please repeat **No.1** and **No.2** until all coin types are sampled.
 A1=Type 1, A2=Type 2, A3=Type 3, A4=Type 4, A5=Type 5, A6=Type 6
4. Please power off and on.

Tip: If you want to re-sample few types, hold on button "SET" to skip others.

Multi Coins Operated Timer Box
